## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on May 13, 2004 has been entered.

### ***Drawings***

The drawings were received on May 13, 2004. These drawings are accepted.

### ***Allowable Subject Matter***

#### **Claims 1-37 are allowed in view of the prior art.**

The following is an examiner's statement of reasons for allowance:

As to claims 1, 12, 19, 22, 23, 26, and 32, the prior art of record, taken either alone or in combination, fails to disclose or render obvious an exposure apparatus and various methods relying upon the apparatus, in combination with the rest of the limitations of the above claims.

Regarding the claims, the applicants' response, dated October 16, 2003, to the Office Action dated July 16, 2003 lay out detailed reasons for the allowability of the claims in view of the prior art. In particular, the prior art fails to disclose the use of a measuring mirror integrally attached to the stage used to carry the device being exposed and acted upon, this mirror being used in conjunction with an interferometer to measure the vertical, or Z, displacement of the stage during exposure. This mirror is totally parallel to the XY plane of the stage. The prior art

of record, both the previously disclosed Ukaji reference and the newly disclosed Loopstra reference disclose the use of mirrors and interferometers to measure the location and vertical displacement of a stage during exposure. In particular, the Ukaji case relies on a mirror with a reflecting surface parallel to the XY plane for such measurement. However, each prior art apparatus relies on a mirror integral to the measurement stage that is inclined at a 45-degree angle to the XY plane; this angle generates problems detailed in the applicants' arguments that are overcome by the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
